THE NEW ALPHA 2.0 SLIDING PATIO DOOR

DESIGNED FOR THE EVERYDAY

D
DURABUILT
WINDOWS & DOORS

LOOKING FOR A HIGH-PERFORMANCE, COST-EFFECTIVE DOOR FOR EVERYDAY USE?

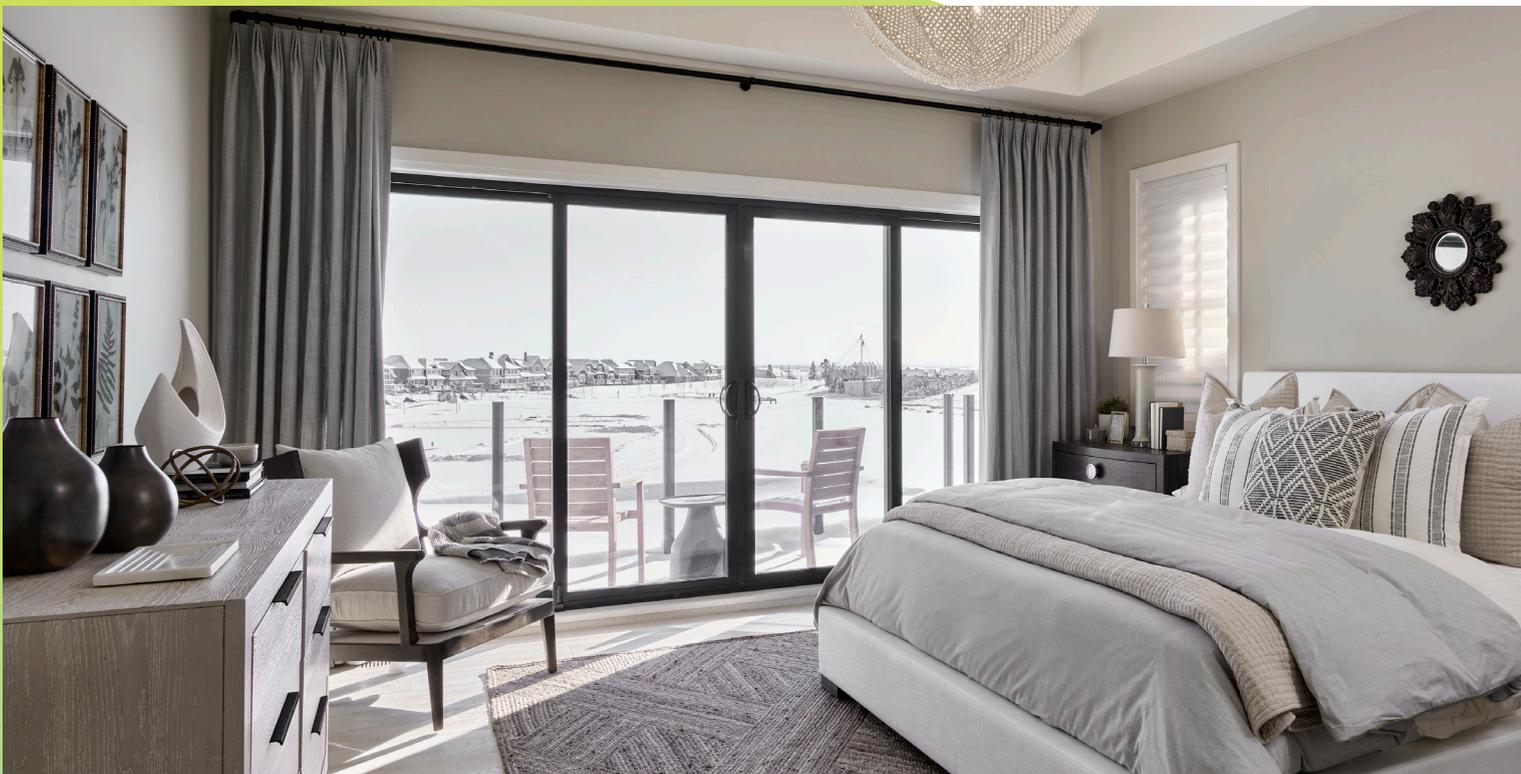

The Alpha 2.0 Sliding Patio Door is the robust and versatile solution you need, even in harsh climates.

Designed With Purpose

Re-engineered and redesigned, the Alpha 2.0 Sliding Patio Door is the new and improved version of the hugely popular Alpha Sliding Patio Door you already know and trust.

Your Feedback Made It Better

Customers asked for smoother operation and better long-term performance. Our team took that feedback into research and added many key features for Version 2.0

KEY STRENGTHS WE'VE RETAINED

Vinyl framing:
Excellent thermal performance, resistance to warping and minimal maintenance.

Compatible with Omega and Delta products:
Exterior trims available to mix and match for a coordinated, consistent look.

Energy efficiency:
Stable indoor temperatures with less demand on HVAC.

Smooth gliding motion:
Easy operation for simple, everyday use.

Integrated blinds:
Privacy and convenience.

Multi-point locking:
Trusted protection from forced entry and a tight weather seal.

Dual- & triple-pane glazing:
Reliable energy efficiency, noise reduction and thermal comfort.

Contemporary style and customizable finishes:
More design freedom to complement interior and exterior styles.

GREAT NEW FEATURES

Easier To Operate

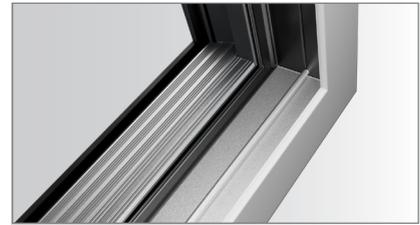

Engineered to reduce strain and extend hardware life.

Up to 50% less force to open: Improved track design and wheels for effortless glide, reduced wear on seals, and longer lifetime.

Strong acetal wheels with quad-roller upgrade option: Smooth, quiet glide and better support for heavier panels.

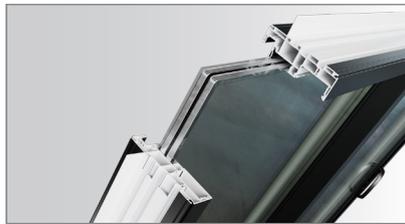

Thinner threshold with steel reinforcement: Easier entry and exit with strong support for larger, heavier doors.

Commercial-Grade Performance

Built to exceed residential standards.

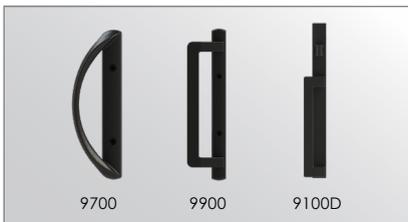

3x stronger than a standard door: Rated up to PG60 and designed to withstand winds up to 247 km/h, similar to a Category 4 hurricane.

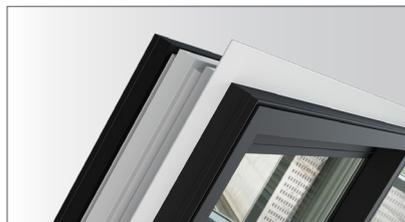

Commercial grade water protection: Tested up to 440 Pa, 2x the industry standard, ensuring reliability in 88 km/h wind-driven rain.

Premium Design Capabilities

Built for smoother operation and long-term durability.

German-engineered Roto handles: Durable hardware with a sleek, modern look and easy operation.

Modern flat-edge styling, with no crevices: Contemporary appearance that's easy to clean and maintain.

PERSONALIZED STYLE, STANDARDIZED DURABILITY

Alpha 2.0 Sliding Patio Door features premium Continental® laminate with patented cool colors PLUS technology. Our laminate reflects solar radiation to keep surfaces cooler and reduce heat absorption, even in darker finishes.

The added white reflective backing reduces heat stress in the laminate, minimizing warping and fading for stronger long-term durability and a consistent finish.

DESIGNED FOR YOU

The Alpha 2.0 Sliding Patio Door is perfectly designed for new-build or retrofit projects across the residential, commercial and industrial sectors of Canada.

The product has been conceived and expertly engineered for:

Dealers

A versatile, high-quality door option to expand showroom offerings and meet customer demand

Builders

Reliable, energy-efficient solutions that simplify installation and enhance project value

Commercial developers

Ideal for multi-family low-rise and mid-rise apartments where durability and performance are essential

Homeowners

Perfect for replacing patio doors or as part of a full renovation, seamlessly complementing the Vinyl Window & Patio Door Series

YOUR TRUSTED SUPPLIER

Proudly based in Edmonton, Alberta with a 280,000-square-foot manufacturing facility, Durabuilt Windows & Doors is a privately-owned Canadian company known for dependable, energy-efficient windows and doors built for Canadian weather. With over 35 years of proven excellence, we continue to expand and improve our products and services every day.
